## Multiplication Equations and Arrays

**Instructions:** Draw lines to match the multiplication equations with their arrays.

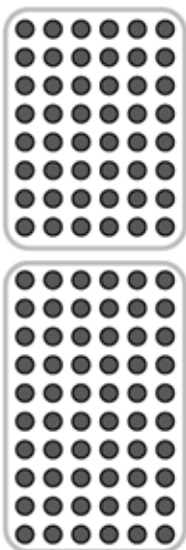

$$33 \times 3 = \underline{\hspace{2cm}}$$

$$6 \times 18 = \underline{\hspace{2cm}}$$

$$23 \times 5 = \underline{\hspace{2cm}}$$

Now, use the arrays to find the products. Write the value for each array, and then write the product where it belongs in each equation.
