

□ Activity 2: Important Places

Think about daily life and what places an immigrant might need to visit. On the "Important Places" pages, make a list of important places in your community with the addresses and a description of why each is important. It might also be helpful to include a picture. When you are done, cut out the pages and glue them on the left and right side of the first pages in your guide.

Important Places

As you finish each activity, glue the pages you have created to the construction paper to make a book.
